

QUALITY INDICATOR AND METHOD FOR FRAME SELECTION  
IN A WIRELESS NETWORK

ABSTRACT OF THE DISCLOSURE

5 A method and system for indicating quality of a  
radio frame transmitted over a wireless link includes  
receiving a radio frame from the wireless link. A power  
indicator for the radio frame is determined based on a  
power control trend of the wireless link. A quality  
indicator for the radio frame is generated based on the  
power indicator.
